

A Texas small business that **designs, builds and operates production software**: multi-tenant SaaS platforms, enterprise APIs, systems integrations and **retrieval-augmented AI**, run on infrastructure we administer. **The person who scopes the work builds it.**

CORE COMPETENCIES

Multi-Tenant SaaS Engineering

Tenant-isolated configuration, per-tenant schema migrations, independent deploys

Enterprise API Development

REST APIs with JWT auth, role-based access, rate limiting, hardened headers; secrets in AWS Secrets Manager

Systems Integration

QuickBooks Online and Time, Smartsheet, Brevo, AWS Textract (OCR), AWS Location; bidirectional sync with reconciliation

Applied AI & RAG

LangChain / LangGraph agents, LangSmith tracing, pgvector semantic search, Anthropic and OpenAI routing, validation gates on model output

CI/CD & Automation

GitHub Actions build, test, deploy, end-to-end suites, nightly DB health checks, secret scanning; documented rollback

Web, Mobile & Geospatial

React, Astro SSR, React Native / Expo; Leaflet / KMZ mapping; PDF and OCR document pipelines

Health-Device Data Integration

Garmin and Withings wearable ingestion, unattended in production since April 2026

DIFFERENTIATORS

- **Operated, not just delivered:** deploys, database health, secret rotation and incident response on infrastructure we run.
- **Verification built in:** pipelines reconcile against the source of record; nightly health checks and secret scans run against production.
- **Isolation by construction:** hard per-tenant resource limits, proven across 7 live tenants.
- **Healthcare from the inside:** the principal has run acute care hospitals and procured EHR systems since 2010.
- **No layer between buyer and builder:** one principal architects, builds and operates.

PAST PERFORMANCE

DHS AI Care Coordinator

Digi-Health Tech Solutions (this firm) · 2026–present · in production

Healthcare RAG platform: care coordinators query clinical, billing, workflow and social-determinants information in plain language. FastAPI, pgvector, LangGraph.

TSI-OS Crew Scheduling & Job Costing

Affiliate, Axiom Industries LLC · Mar–Sep 2026 · commercial
735 API handlers, 7 production tenants, 25 GitHub Actions workflows, about 4-minute deploys with rollback.

HCC Member Portal (Houston Corrosion Committee)

Affiliate, Axiom Industries LLC · Feb–Sep 2026 · commercial
Astro SSR portal, 62 API handlers, Leaflet / KMZ zone mapping, companion React Native mobile app with push notifications.

Production Automation Fleet

Operated by the principal · 2026–present
70 workflows, 2,567 recorded executions; git-backed source control and post-deploy verification.
